

SYMBIO OIL DEGRADER

Benefits

- ✓ *Rapidly degrades mineral oils and diesel*
- ✓ *Degrades phenols*
- ✓ *Degrades volatile aliphatic, aromatic, heavy aliphatic, chlorinated and bromated hydrocarbons*
- ✓ *Water-soluble for use as a spray or solid application*
- ✓ *Supplied with own water-soluble nutrients for one stop application*

A powerful blend of microbes and nutrients capable of degrading the full complement of polluting hydrocarbons, both mineral and volatile. Can be used to treat contaminated surfaces, soils and water.

MODE OF ACTION Symbio Oil Degradar is composed of a blend of the most efficient hydrocarbon degrading microbes combined with soluble nitrogen and phosphorus containing nutrients. The product can be mixed dry into soils or dissolved in water and sprayed onto the contaminated area.

All the bacteria in the product are facultative and have the ability to adapt to most soil conditions.

THE BEST DEGRADATION RESULTS are obtained under aerobic conditions so if adequate aeration of the contaminated material is not possible, Oil Degradar can be used with Symbio Liquid Aeration.

OIL DEGRADER can be used in soils containing up to 20% total hydrocarbon content.

PACK SIZE: 1kg

Precaution

Avoid breathing dust. In case of inadequate ventilation, wear respiratory protection

IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. If experiencing respiratory symptoms call a doctor/physician.

Dispose of contents/container in accordance with local regulations

APPLICATION RATE

Symbio Oil Degradar is typically applied at a rate of 50gms per m³ of contaminated soil or liquid. For Higher levels of contamination apply at a rate of 100gms per m³

For specific application rates contact Symbio with details of the decontamination project.
