

LIQUID BORON 15% B

Provides readily available plant nutrients with biostimulants.

BENEFITS

- Easy to apply
- Use as a foliar feed or soil drench
- Tank mixable with biostimulants, wetting agents, Liquid Aeration

Symbio liquid fertilisers & trace elements

are used in times of stress for rapid and effective balancing of plant nutrients. Liquid fertilisers allow you to reduce and fine tune your nutrient inputs throughout the growing season.

Boron

is directly involved in the translocation of sugars from the leaf to the roots. Some of these sugars are exuded into the root zone to feed beneficial micro-organisms, i.e. boron has a direct biological link.

Application guide: *For best results consult your Symbio representative.
