

SYMBIO COOL TABS

Boost growth and repair disease damage. Replenish the soil food web.

BENEFITS

- Help prevent fertiliser leaching in heavy rain
- Degrade cellulose to reduce thatch
- Solubilise phosphate to make it available to the plant
- Maintain biological activity in the soil for strong healthy grass.
- Assist in repair of disease scars and dry patch

Repair your soil by replacing some of the natural soil biology that is lost to chemicals, drought, and frost.

The beneficial bacteria in Symbio Cool Tabs will help you create a more healthy sward in times of cool season stress.

Symbio Cool Tabs

are an all-natural soil probiotic containing 5 species of beneficial *Bacillus* bacteria found naturally in healthy soils and root zones.

Application guide: *For best results consult your Symbio representative.

SYMBIO COOL TABS

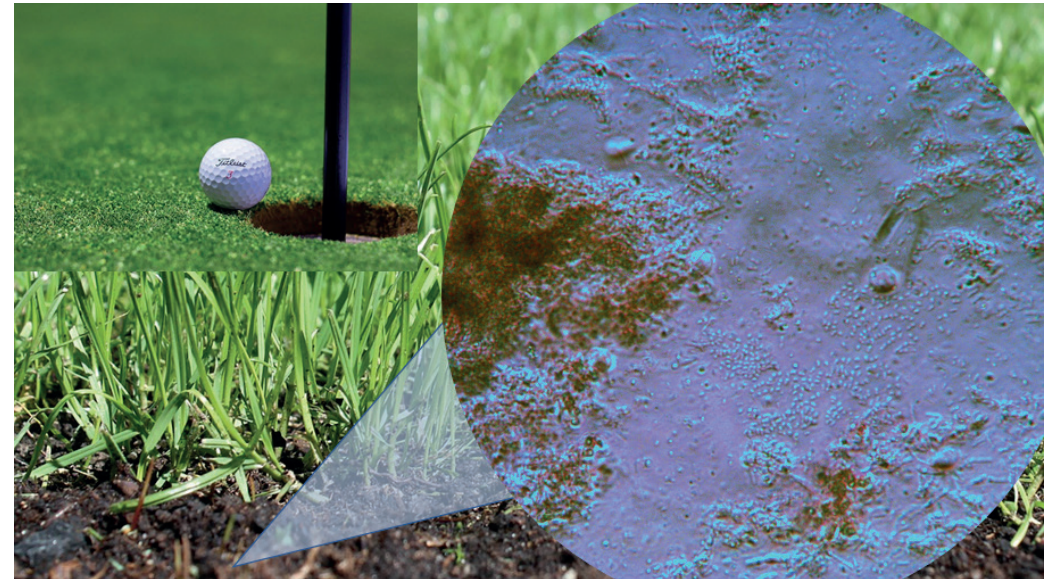

Technical Information

Symbio Cool Tabs

are an easy to use effervescent tablet, that contain enough bacteria spores to naturally treat up to 850m².

How to apply:

- Dissolve 12 Cool Tabs in 600-800L clean chlorine-free water per hectare
- Half fill the spray tank and add the Cool Tabs directly to the spray tank, allow 2-3 minutes for the Cool Tabs to dissolve, then add any biostimulants or liquid fertilisers and fill the spray tank with water
- Symbio Cool Tabs may be tank mixed with biostimulants e.g. Symbio CMS Shoot, Liquid Seaweed 50%, BioBooster Fish 8.7.7, Humic Booster and Fulvic Booster as well as Compost Teas and Symbio Liquid Aeration. They may also be mixed with liquid inorganic fertilisers if applied within 2 hours of mixing in the spray tank.
